

Data - Store_Cities

Data source:

<https://www.kaggle.com/datasets/berkayalan/retail-sales-data>

Data format: **csv**

Number of files: **1**

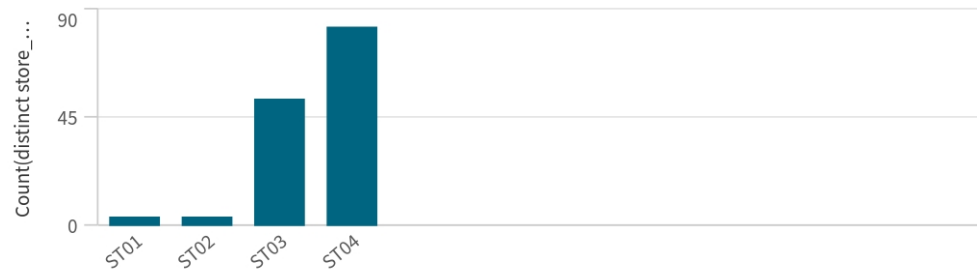

store_cities.csv - Data containing city, type and size information of the stores.

Stores data is small, clean (no NULLS, empty cells or zeros)

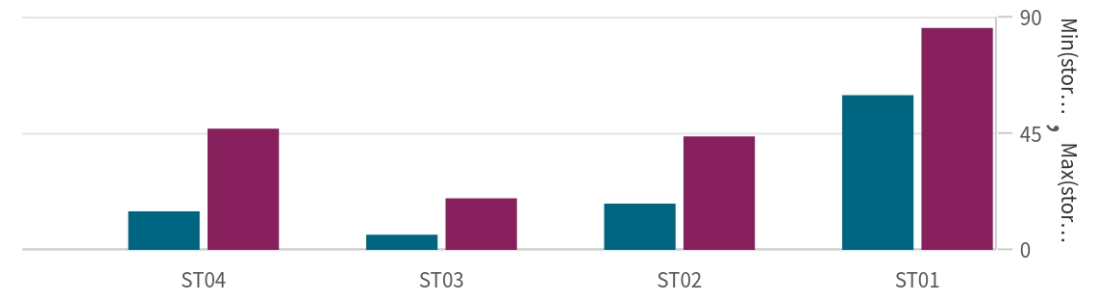

Store Data Exploration

1. There are more number of stores of type ST03 and ST04 than the other 2 types
2. Store of type ST03 and ST04 seem to have small and mid range size compared to Store type ST01. Store type ST02 has size range comparable to store type ST03, but they are fewer in number compared to store type ST03.

Store counts by Store Type

Store Size by Store Type

Stores and Cities

As there is no more data available about cities, like city names for example, not much insights can be gained. Here is a chart showing top 10 cities in terms of number of stores.
